

CYANO WILL LAUNCH A <KICKSTARTER> CROWD FUNDING CAMPAIGN!

The bridgehead for the North American & European market entry

KICKSTARTER

Hello, this is Watoom.

First of all, we want to thank all the divers who love and support CYANO.

With the support of many domestic and overseas divers, CYANO decided to launch a <Kickstarter> crowd funding campaign for our overseas expansion!

“KICKSTARTER” is an early bird system and one of the largest crowd funding platforms, in which when an individual or a company register their product, idea, fundraising goal and expected time for development on the platform, Kickstarter members who want to support the project become a sponsor.

Since this is a great route for start-up companies to get supports in marketing, fundraising, market response and support, many start-ups, small businesses, and even major companies are on Kickstarter.

The official launch and sale in Korea is scheduled to be around March, 2018. If you want to pre-order and/or support CYANO DIVE COMPUTER with a great deal in advance, please join and support our Kickstarter funding.

(scheduled for October 10th)!

We, Watoom, put a lot of efforts on improvement, supplementation, and development. We do our best to produce better products and always think our user’s satisfaction and happiness before anything.

We wish your great interest and support.

**CYANO’s official Facebook page
will be opened this SEPTEMBER!**

We will re-announce the detailed schedule.
